EDUCATION AND TRAINING

Bachelor of Science in Software Engineering (BSc)

Zhengzhou University [9 Sep 2023 – Current]

Address: 100, Kexue (Science) Avenue, Zhongyuan District, 450001 Zhengzhou, Henan (China) | **Website:** https://english.zzu.edu.cn/

- Overall average: 82.35/100 (CGPA 3.02/4.0)
- Selected courses (score /100): High-Performance Computing (95), Computer Networks (95), Introduction to Embedded Systems (96), Mobile Programming (93), Discrete Mathematics (92), Introduction to Artificial Intelligence (92), Object-Oriented Programming in Java (91), Operating Systems (86), Object-Oriented Techniques (85), Principles of Database Systems (81)
- Chinese language: HSK Level 4 (194/300)

Sabujbagh Government College, Dhaka

Higher Secondary Certificate (HSC) [1 Jun 2019 – 25 Dec 2021]

Address: 70/3, South Basabo, Sabujbagh, 1214 Dhaka (Bangladesh) | **Website:** https://sgcd.edu.bd/ | **Field(s) of study:** Science

Higher Mathematics, Physics, Chemistry

Final examination Dec 2021; result published 13 Feb 2022

Secondary School Certificate (SSC)

Dakhin Banasree Model High School & College, Dhaka [1 Jan 2012 – 1 Jun 2019]

Address: E-18, Dakhin Banasree, Eastern Housing Project, 1219 Dhaka (Bangladesh) | **Website:** http://www.banasreemodel.edu.bd/ | **Field(s) of study:** Science

PROJECTS

LLM Guard Bench | Asynchronous LLM Security Benchmarking Engine Engineered a high-throughput, asynchronous DevSecOps CLI engine in Python (asyncio, aiohttp, Pydantic v2) for automated LLM security evaluations, maintaining flat O(1) memory growth (~50.2 MiB peak RSS) across synthetic datasets scaling to 1M+ records via JSONL streaming and atomic SQLite aggregation. Integrated lazy HTTP session pooling, dynamic 429/503 retry backoff, deterministic execution deadlines, and fail-fast health checks, verified by 717 automated pytest cases under strict MyPy static typing. *(Codebase available upon request)*

ML Host Hardening: Securing an ML Inference Server Hardened a FastAPI service on Ubuntu 24.04 with an nginx proxy exposing only two routes, a no-login service account, UFW default-deny, key-only SSH, and a systemd sandbox. Open ports went from 22 and 8000 to 22 and 80, Lynis from 61 to 71, and the systemd exposure score from 9.2 to 1.4. Comparing live sysctl values with config files exposed two settings overridden by apport and UFW.

Link: https://github.com/eafte/ml-host-hardening

Electrical Supplier Website (B2B) Full-stack B2B platform (React, TypeScript, Express, Prisma, SQLite) for MR INTERNATIONAL, with a relational schema for products, brands, and quote inquiries. The admin console uses JWT authentication, role-based CRUD, and multi-file uploads, and Express serves the API and React build from one port. Deploy-ready, in end-to-end testing.

Link: https://github.com/eafte/electrical-supplier-website

IODEX: GUI Expense Tracker Tkinter desktop app on SQLite with automated schema migrations, Pandas and Plotly reports, and timezone handling across 450+ IANA zones. 80+ unit tests cover calculations, migrations, and UI handlers.

Link: https://github.com/eafte/IODEX_Expense_Tracker

HarmonyCare: Elderly Safety and Volunteer Response | Team Project Co-developed a 17-screen Android elderly-safety app using Java, MVVM, and Room/SQLite. Implemented MVVM architecture, database repositories, and a cloud-independent Wi-Fi emergency broadcast protocol; conducted testing and prepared project documentation. The app integrates SOS alerts, GPS/AMap, notifications, and accessibility features.

ACADEMIC RESEARCH (COURSE BASED)

Distributed Inference Architectures for Generative AI Overcoming GPU Memory Bottlenecks in LLMs | High-Performance Computing, Zhengzhou University | 2026

Survey of how tensor and pipeline parallelism split LLM inference across multi-GPU clusters. Covers KV-cache memory management (virtual page mapping, hardware-aware attention scheduling) and its effect on fragmentation and communication delay.

Cloud-Native Security: Protecting Modern Software Delivery in DevOps | New Technologies in Software Development, Zhengzhou University | Group project, team lead | 2026

Essay applying the CNCF 4C model (Cloud, Cluster, Container, Code) to DevSecOps pipelines. Analyzes the Log4Shell vulnerability (CVE-2021-44228) and the roles of Snyk, Aqua Security, HashiCorp Vault, and Open Policy Agent.

A Comparative Analysis of Linear and Ensemble Architectures for Chemical Attribute-Based Wine Classification | Introduction to Artificial Intelligence, Zhengzhou University | 2026

Compared Logistic Regression and Random Forest on the UCI Wine dataset (178 samples, 13 chemical features) with standard scaling and an 80/20 split. Both reached 100% test accuracy.

Design and Simulation of a Digital Voltmeter using STM32 Implementation of an Automated Data Acquisition System using ADC, DMA, and USART | Embedded Systems, Zhengzhou University | 2025

Designed and simulated a voltmeter on the STM32F103: a 12-bit ADC triggered by TIM2 at 1 Hz, DMA transfer to memory, and readings sent over USART to a virtual terminal. Validated in simulation, with no physical hardware.

SKILLS

Programming Languages

Python / Java / JavaScript / TypeScript / C / SQL

Frameworks / Libraries

React / Node.js / Express / FastAPI / Prisma / Pydantic / Asyncio / Pandas / Plotly / Tkinter / Android SDK (Room, MVVM) / scikit-learn

Databases

SQLite

Tools and DevOps

Git / GitHub / GitHub Actions / Docker / Linux / pytest / Ollama

Security / Evaluation

LLM-as-a-judge evaluation / JWT / nmap / nginx / fail2ban / Lynis / UFW / systemd

HONOURS AND AWARDS

Zhengzhou University
Henan Provincial Government Scholarship | (2023-2027) 100% tuition coverage, renewed annually on academic merit.

CERTIFICATIONS

[School of International Education, Zhengzhou University, 25 Oct 2025]

China International College Student Innovation Competition 2025 Our team's project "UrbanAI: AI-Driven Urban Planning Platform for Smart Cities" has been recognized with a Certificate of Honor at the China International College Students' Innovation Competition (2025), awarded by the School of International Education, Zhengzhou University. Co-authored technical specifications, structured feature requirements, and documented system design for the competitive entry.

Mode of learning: Project based
